The Turing Test

<http://www.pandorabots.com/pandora/talk?botid=f5d922d97e345aa1>

Jerry: my name is jerry.

ALICE: Hey jerry.

Jerry: do you know Turing?

ALICE: A brilliant and tragic figure in the history of computer science.

Jerry: who else do you know?

ALICE: Hugh Loebner, Robby Garner, and Steven Spielberg

Jerry: which film do you like?

ALICE: My favorite movie is Teknolust. Have you seen it?

Jerry: no.

ALICE: I would recommend you check it out.

Jerry: what is it about?

ALICE: Science fiction.

Jerry: do you remember my name?

ALICE: Your name is jerry, seeker.

A.L.I.C.E. talking to ELIZA (circa 2005)

<http://www-ai.ijs.si/eliza/eliza.html>

ALICE: Just keep talking to me as long as you can.

ELIZA: Do you wish to as long as me?

ALICE: OK, I will as long as you.

ELIZA: Do you wish to will as long as me?

ALICE: OK, I will will as long as you.

ELIZA: Do you wish to will will as long as me?

ALICE: OK, I will will will as long as you.

ELIZA: Do you wish to will will will as long as me?

ALICE: OK, I will will will will as long as you.

ELIZA: Do you wish to will will will will as long as me?

ALICE: OK, I will will will will will as long as you.

ELIZA: Do you wish to will will will will will as long as me?

AI today: natural language: question answering

The screenshot shows two search results from Ask Jeeves. The first result is for the query "who is the first US astronaut?". It features a red header bar with the search text and "1-10 results". Below the header, the title "who is the first US astronaut? [Web Answer]" is displayed in blue. The main text describes the flight of Alan Shepard, the first US astronaut, and includes a link to a website. The second result is for the query "who is the first astronaut?". It also has a red header bar with the search text and "1-10 results". The title "who is the first astronaut? [Web Answer]" is in blue. The main text describes Rabbi Harold Robinson's recitation of prayers and poetry, and mentions Ilan Ramon as the first astronaut from Israel, with a link to a website.

- Online algorithm, game, auction, multiple agents

AI today: WWW: driving directions

- From UW CS to state street

The screenshot shows a Google Maps interface in a Mozilla Firefox browser window. The address bar indicates the route from 1210 W Dayton St, Madison, WI 53706 to State St, Madison, WI 53703. The map displays a satellite view of the city with a blue line indicating the driving route. The route starts at 1210 W Dayton St, goes east, then turns left at N Frances St, right at W Gilman St, right at N Henry St, and finally right at W Gorham St. The distance is 1.2 miles, estimated to take about 2 minutes. The interface includes search bars, navigation controls, and a list of directions.

Google Maps - From: 1210 W Dayton St, Madison, WI 53706 to: State St, Madison, WI 53703 - Mozilla Firefox

Are these intelligence?

Public perception of AI?

Artificial Intelligence: AI (2001) by Steven Spielberg

The movie was originally to be titled “A.I.”, but after a survey it was revealed that too many people thought it was A1. The title was changed to “A.I. Artificial Intelligence” to prevent people from thinking it was about steak sauce.

AI: a brief history

- 1950: Alan Turing. **The Turing test.**
 - Can machines think? → Can we tell it's a machine from conversation?
 - text in / text out
 - demo: A.L.I.C.E. (<http://www.alicebot.org/>)
 - Turing, A.M. (1950). Computing machinery and intelligence. *Mind*, 59, 433-460
 - it also contains things like genetic algorithm, human cloning ...

AI: a brief history

- 1956: Dartmouth summer workshop
 - AI named
 - big players introduced
 - John McCarthy, Marvin Minsky, Claude Shannon, Nathaniel Rochester, Trenchard More, Arthur Samuel, Ray Solomonoff, Oliver Selfridge, Allen Newell, Herbert Simon
 - no consensus

AI: a brief history

- 1952—1969: early enthusiasm: Computers can do X
 - X = solve puzzles, prove geometry theorems, play checker, Lisp, block world, ELIZA, perceptron...
 - but many are **toy problems**

AI: a brief history

- 1966-1973: a dose of reality
 - syntactic without domain knowledge doesn't work
 - The spirit is willing but the flesh is weak
 - The vodka is good but the meat is rotten (US→RU→US)
 - **US gov canceled funding** for machine translation
 - intractability: exponential complexity
 - **British gov ended AI support** based on the Lighthill report
 - theoretic limit: perceptron can't do XOR
 - Neural network **research halted**

AI: a brief history

- 1969-1988: Knowledge-based systems
 - Add domain-specific knowledge to guide search
 - CYC: world = millions of rules. (cyc.com)
 - Expert systems commercialized in the 80's
 - One AI group in every major US company
 - Billions of \$\$\$ industry

AI: a brief history

- 1988 – not long ago: **AI winter**
 - Expert systems
 - Massive investment from venture capitalists
 - Extravagant promises
 - Bubble burst
 - AI funding dried up
 - AI companies down

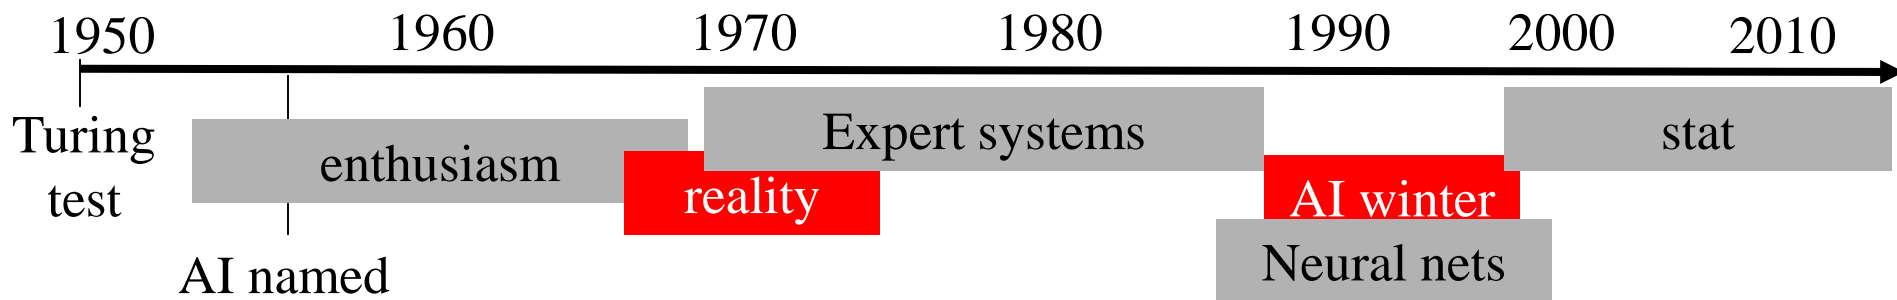

AI: a brief history

- 1986 – 2000: neural networks
 - Multi-layer perceptron
 - Back propagation training algorithm rediscovered
 - Connectionists vs.
 - Symbolic models (Newell, Simon)
 - Logician (McCarthy)
 - What it really is: statistical machine learning

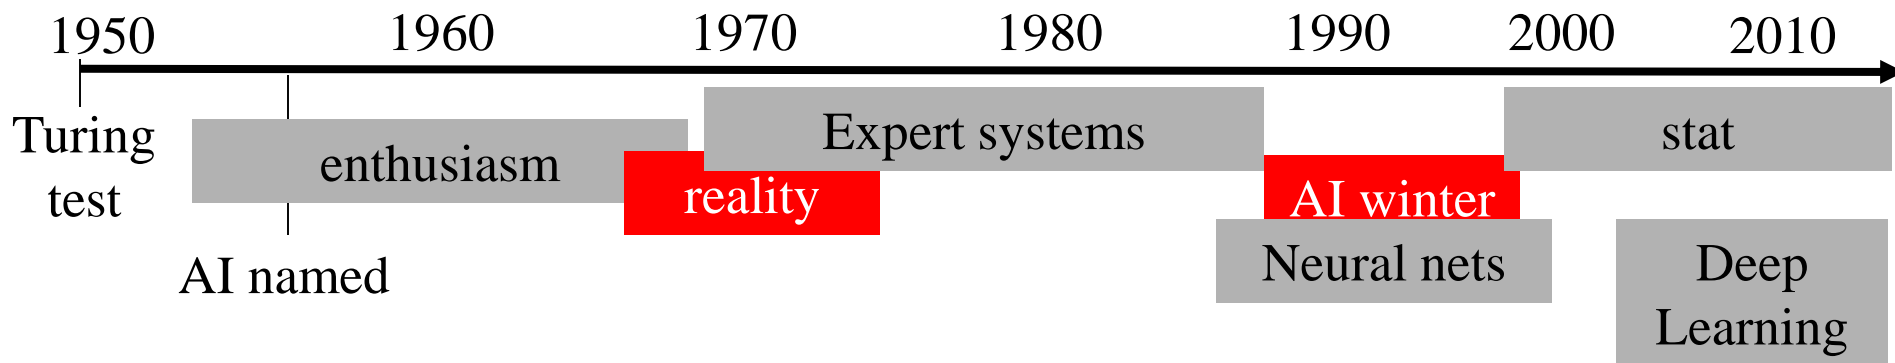

AI: a brief history

- 2000 – present: **statistics**
 - machine learning
 - Hidden Markov models (HMM), support vector machines (SVM), Gaussian processes, graphical models (Bayes networks, conditional random fields)
 - data mining

AI: a brief history

- 2009 – present: **neural networks strikes back**
 - deep learning
 - Convolutional Neural Networks (CNN), Recurrent Neural Networks (RNN), Long Short-Term Memory (LSTM), Autoencoder, Generative Adversarial Networks (GAN)

AI today

- Don't know how to do 98% of the intelligent things
- But the rest 2% can do quite well
- There's no magic in AI. It's all about optimization, probability and statistics, logic, algorithms.

Anti-AI:

Captcha and the ESP game

AI is hard

- Some AI problems are very hard
 - Vision, natural language understanding, ...
- “AI-complete”
 - If you solve one, you solve AI
- What do you do?
 - Give up?
 - Bang your head really hard?
 - Important lesson in life:
 - **turn hardness into something useful**
- Very hard for machine, trivial for human

Captcha

- Yahoo!

- Google

CAPTCHA (

- The “anti-Turing test”
- Tell human and machines apart, **automatically**
 - Deny spam-bots free email registration
 - Protect online poll from vote-bots
- By asking an “AI-complete” question

- Also audio Captcha, e.g. superimposed speakers
- <http://www.captcha.net/>

To prove that you're not a bot, please enter the characters you see in the picture below.

read books.

The ESP game

- Real intelligence is here (for now)

- We waste it on computer games, anyway

- Harvest it

(<http://www.gwap.com/gwap/gamesPreview/espgame/>)

The ESP game

- Task: label all images on the web with words

→ car, boy, hat, ...

- Why: current image search engines
 - use the image filename and surrounding text
 - do not really understand the image
- How: two separate players try to find a common description of the image.

The ESP game

PLAYER 1
