

Errata File for *p-voltages: Laplacian
Regularization for Semi-Supervised Learning
on High-Dimensional Data*

August 13, 2013

Theorem 3.1 should read $n \rightarrow \infty$, not $n \rightarrow 0$. This is a simple typographical error. We are studying the limit where we have a potentially unbounded amount of data, where the number of the points in the graph n approaches infinity. This is the setting where standard Laplacian Regularization breaks down, which is the issue that *p-voltages* is attempting to solve.
