COURSE PLAN – COMPUTER SCIENCES CERTIFICATE
Effective February 2013

Name: _____

Student ID: _____

Approved by: _____

Date: _____

You are eligible to obtain a Computer Sciences (CS) Certificate if you are either (1) enrolled in a bachelor's degree program at UW-Madison, and you are not in the Law School, and you are not majoring in CS, Electrical Engineering (EE), or Computer Engineering (CE); or (2) you are a Special Student at UW-Madison who has already earned a bachelor's degree in a major other than CS, EE or CE.

To earn a CS Certificate, a student must complete 6 CS courses, each worth at least 2 credits, and each with a minimum grade of C, including the following:

- CS 302 and CS 367 (or equivalent transfer or AP credits)
- at most 4 courses below the 400 level
- at least 2 courses at the 400 level or above
- for students currently enrolled in a bachelor's degree program at UW-Madison: at least 50% of the credits must be in residence at UW-Madison; for Special Students: at least 12 of the credits must be earned in residence at UW-Madison, either while enrolled as a University Special student or from undergraduate course work at UW-Madison; in both cases, non-graded (S/U) courses taken in residence cannot be used

Completing just CS 367 counts as completing both CS 302 and CS 367 (and in that case, only 5 courses total are required).

The following courses may *not* be used for the CS Certificate: CS 250, CS 298, CS 304, CS 368, CS 371, CS 402, CS 550, CS 699 and CS 915. CS 638 may be used only if it has been approved for use towards the CS Major.

Course	Semester (to be) taken	Grade
CS 302		
CS 367
