

## Certification Letter

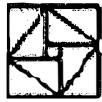

Mr. Shuai Shao, registration No. PB10001100, has been selected to enroll in the HUA Loo-Keng Talent Program in Mathematics. He has completed all the courses required and will graduate in July 2014.

The HUA Loo-Keng Talent Program in Mathematics aims to cultivate leading mathematical talents. Each year, about 30 students among all freshmen of the university was selected by paper tests and interviews to join this program in USTC. This program mainly consists of eight courses and a series of seminars, which are more advanced than what normal mathematical majors receive and have more stringent scoring criteria.

Among all the 2014 graduates, only twelve students have completed all course requirements. I have a good reason to believe that these graduates are more promising and they are able to attain excellent achievements in mathematical research field.

## CERTIFICATE OF HUA LOO-KENG TALENT PROGRAM IN MATHEMATICS

This is to certify that Mr. Shuai Shao (Student ID: PB10001100, Date of Birth: XX. XX, 1993), the student of HUA Loo-Keng Talent Program in Mathematics (Honors Program), was admitted to take Master Program courses and get scientific research training in the major of Cryptography for one year in our academy (from Sept. 2013 to Jul. 2014).

HUA Loo-Keng Talent Program in Mathematics (Honors Program) is a USTC (University of Science and Technology of China) –AMSS (Academy of Mathematics and Systems Science, Chinese Academy of Sciences) joint training program, the goal of the joint program is selecting talented and dedicated students and to bring up academic leads and talents in the field of mathematics and systems science.
