Some scenarios...

Scenario I: Hated it!

Hated CS-570

Never wants to do HCI again!

```

def removeComment(self, view, commentData, region):
    (lineComments, blockComments) = commentData

    wholeRegion = view.extractScope(region.begin())

    # Try and remove it as a block comment first
    for c in blockComments:
        (start, end, disableIndent) = c
        startRegion = sublime.Region(wholeRegion.begin(),
            wholeRegion.begin() + len(start))
        endRegion = sublime.Region(wholeRegion.end() - len(end),
            wholeRegion.end())

        if view.substr(startRegion) == start and view.substr(endRegion) == end:
            # It's faster to erase the start region first
            view.erase(startRegion)

            endRegion = sublime.Region(
                endRegion.begin() - startRegion.size(),
                endRegion.end() - startRegion.size())

            view.erase(endRegion)
            return True

    # Try and remove any line comments
    foundLineComment = False

    startPositions = [advanceToFirstNonWhitespaceOnLine(view, r.begin())
        for r in view.lines(region)]
    startPositions.reverse()

    for pos in startPositions:
        for c in lineComments:
            (start, disableIndent) = c
            commentRegion = sublime.Region(pos,
                pos + len(start))
            if view.substr(commentRegion) == start:
                view.erase(commentRegion)
                foundLineComment = True
                break

    return foundLineComment

def blockCommentRegion(self, view, blockCommentData, region):
    (start, end, disableIndent) = blockCommentData
    view.insert(region.end(), end)
    view.insert(region.begin(), start)

def lineCommentRegion(self, view, lineCommentData, region):
    (start, disableIndent) = lineCommentData

    startPositions = [r.begin() for r in view.lines(region)]
    startPositions.reverse()

    # Remove any blank lines from consideration, they make getting the
    # comment start markers so line up challenging
    nonEmptyStartPositions = filter(lambda p: hasNonWhitespaceOnLine(view, p),
        startPositions)

    # If all the lines are blank however, just comment away
    if len(nonEmptyStartPositions) != 0:
        startPositions = nonEmptyStartPositions

    if not disableIndent:
        minIndent = None

        # This won't work well with mixed spaces and tabs, but really,
        # don't do that!
        for pos in startPositions:
            indent = advanceToFirstNonWhitespaceOnLine(view, pos) - pos
            if minIndent == None or indent < minIndent:
                minIndent = indent

        if minIndent != None and minIndent > 0:
            startPositions = [r + minIndent for r in startPositions]

    for pos in startPositions:
        view.insert(pos, start)

def addComment(self, view, commentData, preferBlock, region):
    (lineComments, blockComments) = commentData

    if len(lineComments) == 0 and len(blockComments) == 0:
        return

    if len(blockComments) == 0:
        preferBlock = False

    if len(lineComments) == 0:
        preferBlock = True

    if region.empty():
        if len(lineComments) == 0:
            # add the block comment
            self.blockCommentRegion(view, blockComments[0], region)
        else:
            # comment out the line
            self.lineCommentRegion(view, lineComments[0], region)

```

Scenario 2: Loved it!

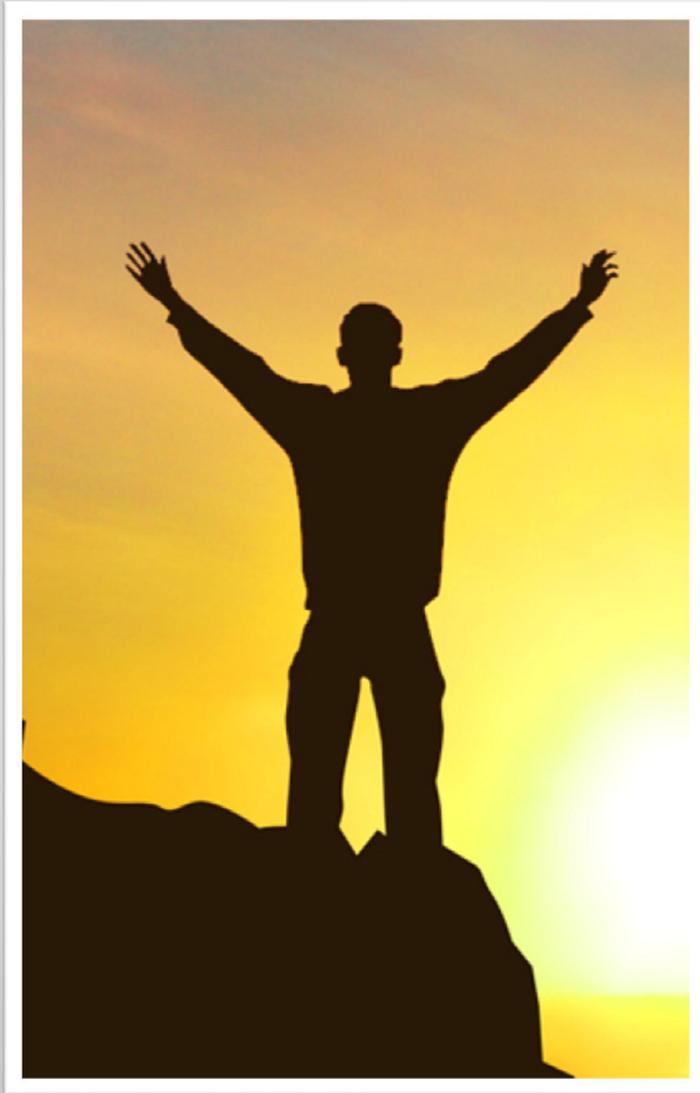

Loved CS-570

Wants to go to grad school to
do more advanced work

Masters vs. Ph.D.

One-off continuing education courses

Scenario 3: Like it, ready to work!

Liked UX and software engineering

Wants a job to both design and develop

Companies with HCI jobs

Accenture	Friendfeed	Pitney Bowes
Adobe	Frog Design	Pixar
Aduna	General Dynamics	Qualcomm
Agitar Software	General Electric	Ricoh Americas
Allstate Insurance	Google	Sapient
Amazon.Com	Guidewire Software	Scholastic
Apple	Hewlett-Packard	Soar Technology
Autodesk	Hillcrest Labs	SRI International
Boeing	Hindustan Times, New Delhi	T-Mobile
Brulant	Honeywell Labs	Tellme Networks
Carnegie Mellon	Humancentric	The Pittsburgh Cultural Trust
Citadel Investment	IBM	The University Of Pittsburgh
Citrix Systems	Intel	University Of Michigan
Colorado State University	Johnson Controls	UPMC
Cook Vascular	Keane Federal Systems, Inc.	Verizon
Corel	Linden Lab	Walmart Labs
DoubleClick	Linkedin	Wellspring Worldwide, A
The Wall Street Journal Online	Logical Design Solutions	Company I Co-Founded Before
Duda Paine Architects	Microsoft	Hcii
Electronic Arts	Motorola	Yahoo!
Endeca Technologies	NASA	Zeta Associates
Facebook	Oracle Corp	Zühlke Engineering

For example!

Nathalie Cheng

- Took CS-570 in Spring 2010
- Completed an *L&S Individual Major in HCI*
- Interned at Chomp Inc., which was acquired by Apple in 2012
- Now works at *Lab 126*

Natalie's Curriculum

Computer Science

- CS 302 - Intro to Java
- CS 304 - Intro to Java WES-CS Group Study
- CS 368 - Intro to HCI
- CS 838 - HCI Research Methods

Psychology

- PSYCH 202 - Intro to Psych
- PSYCH 210 - Basic Stats for Psych
- PSYCH 225 - Experimental Psychology
- PSYCH 414 - Cognitive Psychology

Art

- Art 102 - 2D Design
- Art 112 - Drawing I

- Art 346 - Typography and Communication Design

Industrial & Systems Engineering

- ISYE 349 - Intro to Human Factors
- ISYE 652 - Sociotechnical Systems
- ISYE 662 - Design & Human Disability & Aging

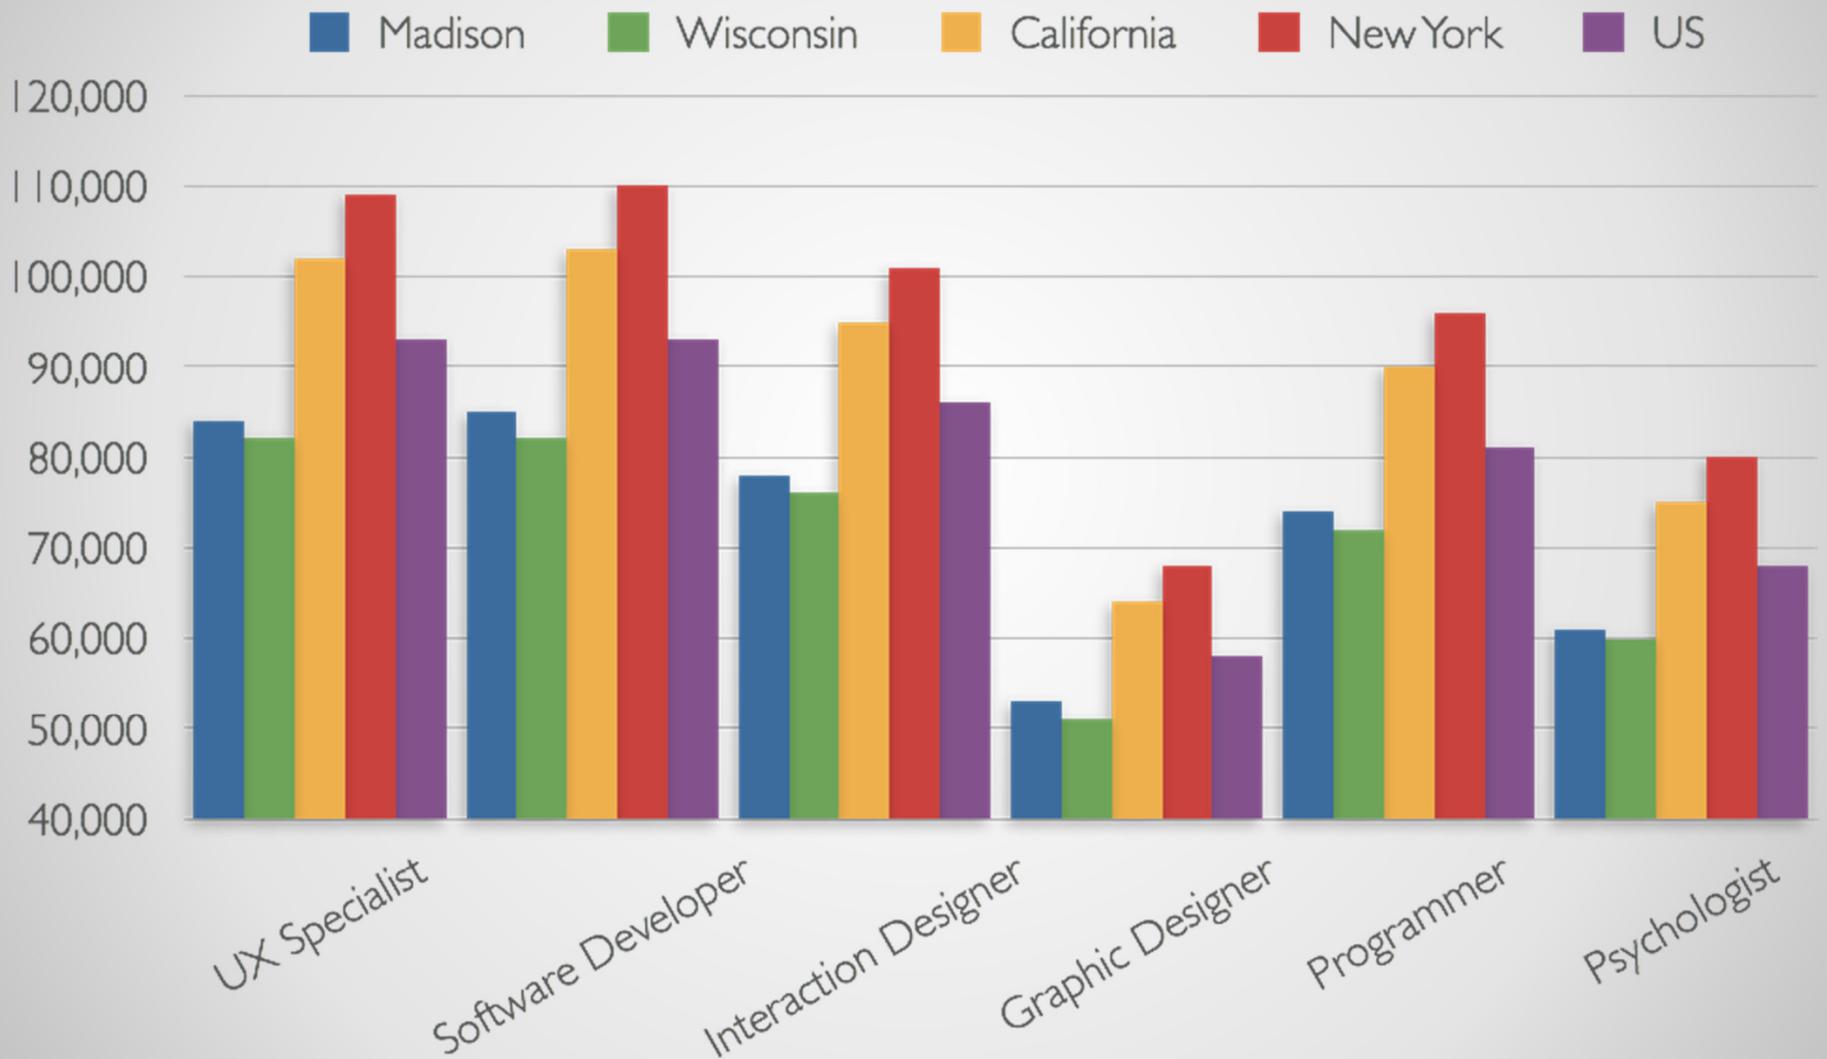

Communication Arts

- COM ARTS 970 - Seminar in Computer-Mediated Communication

Curriculum & Instruction

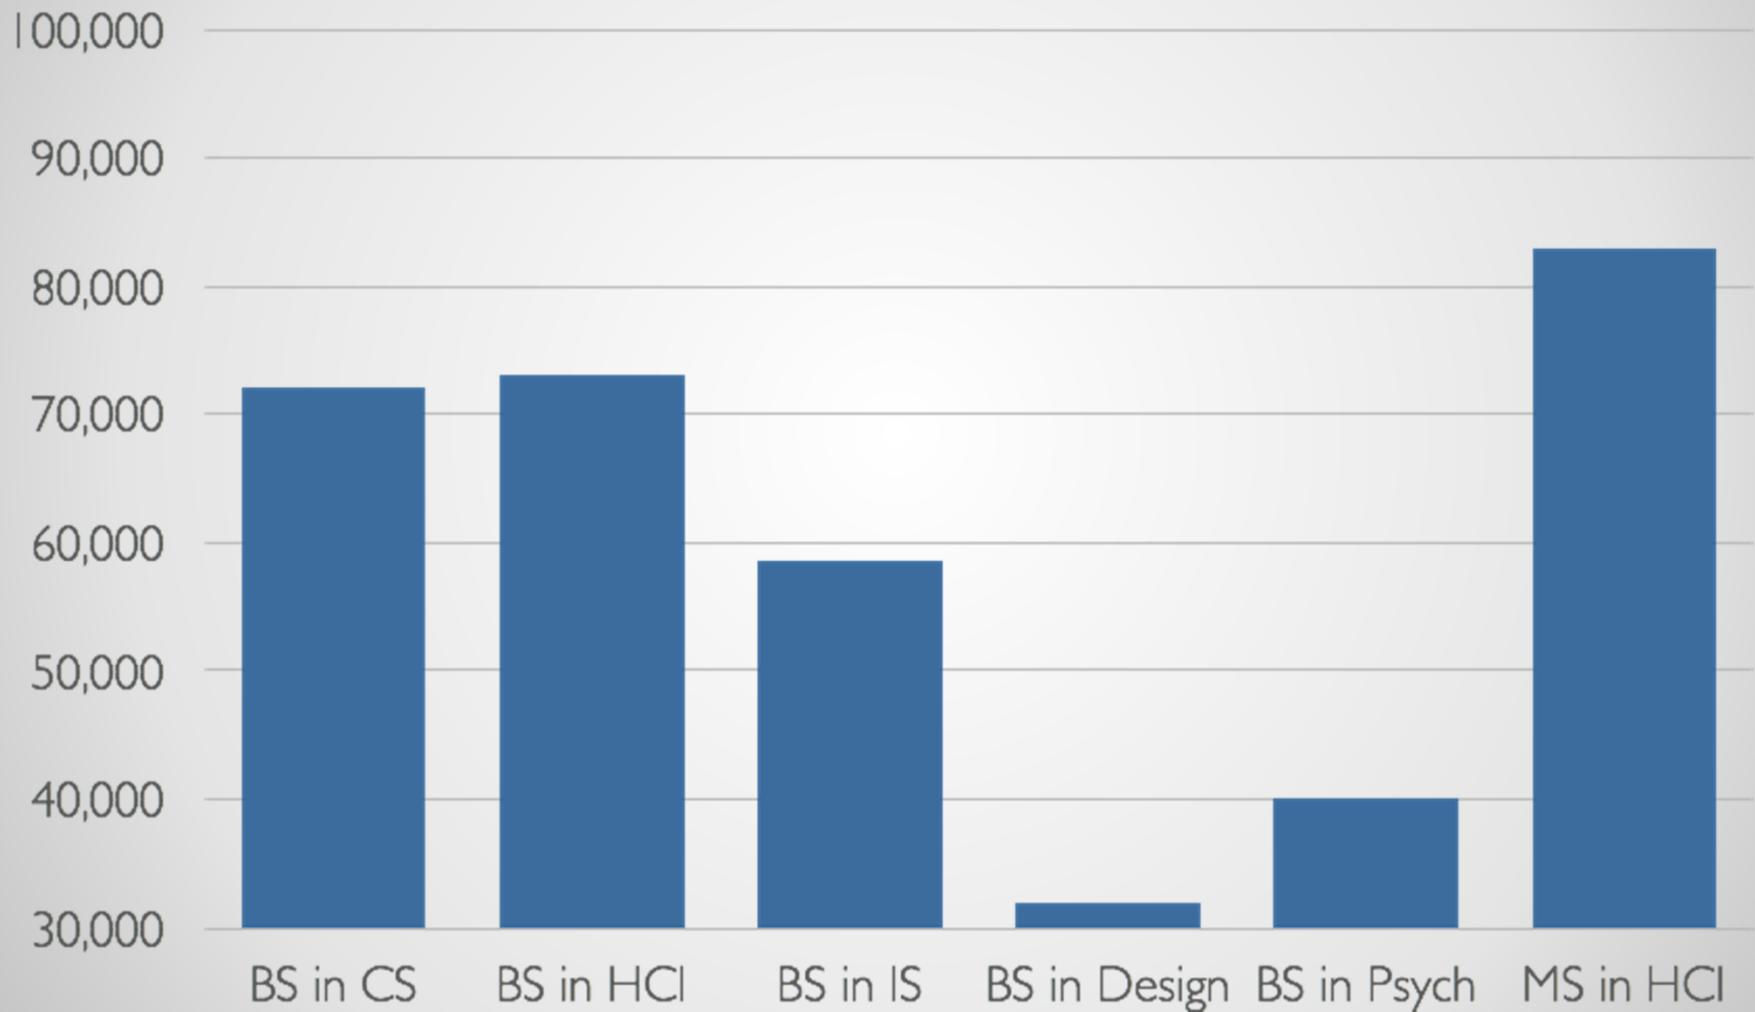

- C&I 375 - Videogames & Learning
