The International Symposium on Computer Architecture is widely recognized as the premiere forum for presenting computer architecture research, and ISCA 2005 promises to uphold that tradition. The 32nd annual ISCA will be held at the Monona Terrace in downtown Madison, Wisconsin. Inspired by the renowned architect Frank Lloyd Wright, the Monona Terrace provides a beautiful and state-of-the-art meeting space.

The Monona Terrace is located on Lake Monona, one of the four lakes that give Madison its natural beauty. Consistently ranked nationally as one of the top places to work, live, and play, Madison offers an extensive collection of quality dining and recreation opportunities.

With a reception and organ recital at Madison's beautiful new Overture Center (shown left), ISCA 2005 attendees will get to experience what Madison has to offer first hand. We look forward to your attendance to ISCA 2005 and thank you for your contributions in helping make this year's ISCA be a memorable experience for all.
