

Sample Code:

```
b = inb (SOME_PORT);
switch (b) {
  case 1:
    printk (``Byte 1 read\n");
    b -= 1;
    printk (``Result %d\n", 100 / b);
    break;
  default:
    if ((b & 128) == 0) {
      printk (``b&128\n");
    } else {
      printk (``!b&128\n");
    }
    break;
}
```
