

WELCOME TO CS200!

Sam Vinitzky

CS200 Summer 2019

WHAT IS THIS COURSE ABOUT?

- Making **computers** do cool things

HOW CAN WE TELL COMPUTERS WHAT TO DO?

- **Program: (or algorithm)**
 - List of instructions for **accomplishing a task**

Creamy Alfredo Vegetable Pasta with Prosciutto and Peas

You will want to dive right in to this lighter take on a classic, creamy Alfredo dish with an abundance of mouthwatering ingredients.

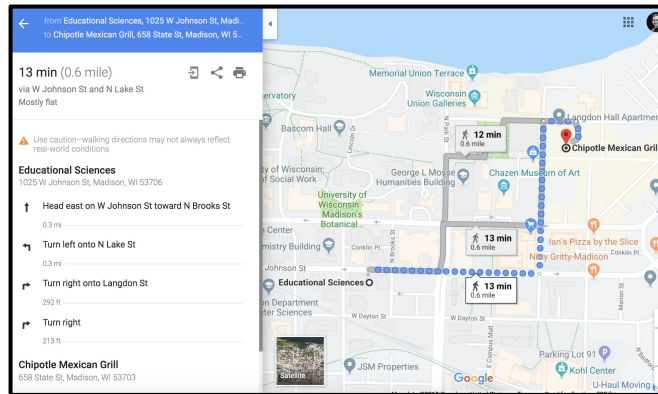

**MAKES
4 SERVINGS**

Tip

For convenience, you can use a 7-oz (200 mL) can of sliced mushrooms, drained, instead of the fresh mushrooms. Add them after the prosciutto has cooked for 5 to 7 minutes and is almost crisp.

4	zucchini, ends cut flat	4
2 tbsp	olive oil	30 mL
8 oz	mushrooms, sliced	250 g
2 oz	prosciutto, chopped	60 g
1½ cups	heavy or whipping (35%) cream	375 mL
½ cup	butter	75 mL
1 cup	freshly grated Parmesan cheese, divided	250 mL
Pinch	kosher salt (optional)	Pinch
Pinch	freshly ground white or black pepper	Pinch
Pinch	ground nutmeg	Pinch
1 cup	frozen peas, thawed	250 mL

1. Using a spiralizer, cut zucchini into thin strands. Set aside.
2. In a large skillet, heat oil over medium heat. Add mushrooms and prosciutto; cook, stirring, for 6 to 8 minutes or until mushrooms are softened and prosciutto is slightly crisp. Set aside.
3. In a medium saucepan, bring cream and butter to a gentle boil over medium-high heat. Reduce heat and simmer, stirring, for 3 to 5 minutes or until sauce begins to thicken. Whisk in ½ cup (75 mL) cheese and simmer, stirring, for 1 to 2 minutes or until creamy and smooth. Remove from heat and stir in 2 tbsp (30 mL) cheese, salt (if using), pepper and nutmeg.
4. Add zucchini, peas and cream sauce to the skillet, tossing gently. Return skillet to low heat and simmer, stirring, for 2 to 3 minutes or until zucchini is cooked to desired tenderness. Serve garnished with the remaining cheese.

As performed by The Piano Guys

A MILLION DREAMS

from THE GREATEST SHOWMAN

Words and Music by BENJ PASEK and JUSTIN PAUL
Arranged by Jon Schmidt and Al van der Beek

Moderately, with intensity

The image displays a piano score for the song 'A Million Dreams'. It features a treble and bass clef with a 4/4 time signature. The score includes a key signature of one flat (B-flat major) and a tempo marking of 'Moderately, with intensity'. The music is arranged for piano and includes various musical notations such as notes, rests, and dynamics.

COURSE LOGISTICS

LECTURES

- Monday → Thursday, **1:00 PM- 2:15 PM** in Ed Sci 228 (this room)
- **8 weeks** (August 8th is the last day of class)

ATTEND CLASS

- Small percentage of your grade, but...
- **No way to get the material you missed**
 - Most of class is code examples...
- If something is preventing you from attending, **let me know**
 - Illness, etc → email me
 - Lectures are boring/too slow/too fast/not useful → anonymous feedback form

NO ELECTRONICS IN CLASS

Image source: <https://www.youtube.com/watch?v=rQBRpVuQSzk>

PROGRAMMING ASSIGNMENTS

- **2** assignments every week
 - Out **Monday** after class, due **Thursday** by 11:59 PM
 - Out **Thursday** after class, due **Monday** by 11:59 PM
- Turn in on Canvas
- **(Po is out now, due Thursday at 11:59 PM...)**

ASSESSMENT

- **Programming Assignments:** (90%)
- **Midterm Exam:** (4%)
 - In class on **July 11th**
- **Final Exam:** (5%)
 - In class on **August 8th**
- **Participation:** (1*%)
 - Show up to class, ask questions, come to office hours, etc

TURN IN ASSIGNMENTS ON TIME

- **No late assignments will be accepted**
- **Slip days:**
 - Each “slip day” extends the due date by 24 hours
 - 5 total
 - 2 on any given assignment
- Slip day form on Canvas

Piazza Posting Guidelines

Welcome to Piazza!

Piazza is a fantastic resource that allows students to ask questions that are visible to **all** other students! That means we have a few rules:

- Do not post any code that you have written for a programming assignment publicly.** Use the "private" option to make sure that it is only available to course staff. This is to avoid any possibility of academic dishonesty. If you post code publicly, we will mark it as private for you, as well as scold you for not reading this post.
- Before posting, make sure that your question hasn't already been answered.** There are only two course staff, and there are only so many hours in the day. Please, before posting, check the other posts for the topic you are posting about by either (a) searching or (b) filtering by a folder. This will save you (and us) a lot of time. If we notice that you have posted a duplicate question, we will snarkily link you to the original question.
- Feel free to answer other students' questions.** Again, we only have so much time. If you see a question you know the answer to, feel free to answer it. We have the ability to endorse student answers that we think are exceptionally useful.

Thanks, and happy Piazza'ing!

OFFICE HOURS

Instructor: Sam Vinitzky

Email: vinitzkys@cs.wisc.edu

Office Hours: (in CS 1301)

- Thursdays: **2:30 - 3:30 pm**
- Saturdays: **1:00 - 2:00 pm**
- Sundays: **5:00 - 6:00 pm** [except July 14]
- or by appointment
- or directly after class, in EdSci228
- or whenever I'm in my office with the door open

TA: Alex Anderson (aanderson65@wisc.edu)

Email: aanderson65@wisc.edu

Office Hours: (in CS 1304)

- Mondays: **2:30 - 3:30 pm**
- Tuesdays: **11:30 am - 12:30 pm**
- Wednesday: **2:30 - 3:30 pm**
- Thursday: **10:30 - 11:30 am**
- or by appointment

ASKING QUESTIONS ONLINE:

Office hours are the best place for asking questions!

Anonymous feedback form is there for you too!

Is this a question/comment **other people** might have, or care about?

yes

No, it's something that literally only applies to you

Did someone **already post** about this on Piazza?

no

Is your question/comment **personal** or sensitive in nature?

yes

Does your post **contain code** you have written for an assignment?

no

yes

Post on a **follow-up** on that post

no

Post on Piazza

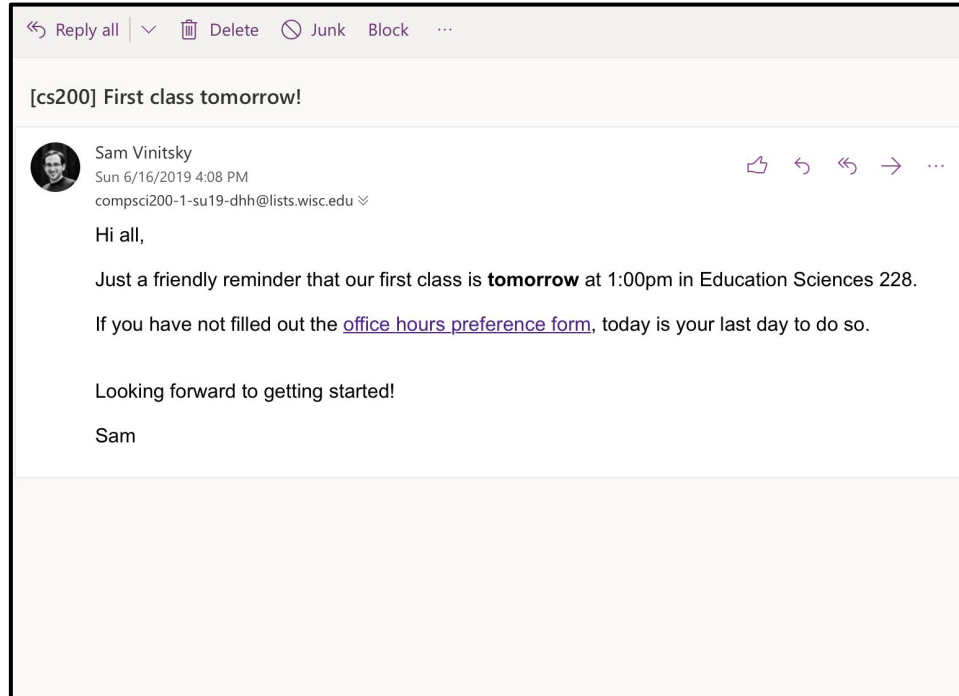

yes

Post **privately to instructors** on Piazza

Email Sam (include "CS200" in the subject, and more detail...)

HOW WILL SAM COMMUNICATE WITH ME?

- **Email list!**
 - If you did not get my email yesterday, tell me ASAP (via email)

TIPS FOR SUCCESS IN CS200

DIFFICULTY WARNING!

- This class will be **hard** and **a lot of work**
 - This class is usually 15 weeks...
 - Learning a new **way of thinking**
 - Learning a new “language”
 - Computers...

TIP #1: START EARLY

- Start assignments the **day** they are assigned
- Assignments will be **hard**, and will take a long time (worth 90%...)
 - It's impossible* to estimate the amount of time a program will take
- We're here to help, but not all the time...

TIP #2: ASK QUESTIONS

- Ask questions in **lecture**
- Ask questions about the **assignments**
 - Piazza!
- Ask questions of **Java**
 - Just try things...
 - Experimentation is **key**

TIP #3: HAVE FUN!

www.shutterstock.com • 1056496400

ComputePaintSupplies.class

JAVA PROGRAMMING FLOW: SUMMARY

1. **Write** your program (using a text editor) in Java
 2. **Compile** your program into bytecode (`.class` file)
 3. **Run** your code!
-
- How to do this in Visual Studio Code?

JAVA PROGRAM STRUCTURE

```
public class Welcome {  
    public static void main(String[] args){  
        System.out.println("Welcome to CS200!");  
        System.out.println("Good luck!");  
        // you're gonna need it...  
    }  
}
```

JAVA PROGRAM STRUCTURE

- **“Class declaration”**
- Every file starts with this
- `public class` → always
- Green word = “Class name”
 - Same as file name
 - (Welcome.java)
- Everything must be inside the curly braces

```
public class Welcome {  
  
    public static void main(String[] args){  
        System.out.println("Welcome to CS200!");  
        System.out.println("Good luck!");  
        // you're gonna need it...  
    }  
  
}
```

JAVA PROGRAM STRUCTURE

- “**main function**”
- Needs to look EXACTLY like this.
- We’ll explain more on Thursday.
- Pair of curly braces
- When the program is run, the code written in “main” will get executed line by line

```
public class Welcome {  
    public static void main(String[] args){  
        System.out.println("welcome to CS200!");  
        System.out.println("Good luck!");  
        // you're gonna need it...  
    }  
}
```

JAVA PROGRAM STRUCTURE

- “**statement**”
- Line of code to be executed
- Ends in a semicolon “;”
- This one will output
“**Welcome to CS200**” to
the screen
- Happens first

```
public class Welcome {  
    public static void main(String[] args){  
        System.out.println("Welcome to CS200!");  
        System.out.println("Good luck!");  
        // you're gonna need it...  
    }  
}
```

JAVA PROGRAM STRUCTURE

- “**print statement**”
- Outputs the stuff between the parentheses

```
public class Welcome {  
  
    public static void main(String[] args){  
        System.out.println("Welcome to CS200!");  
        System.out.println("Good luck!");  
        // you're gonna need it...  
    }  
  
}
```

JAVA PROGRAM STRUCTURE

- “string”
- Quotes tell Java that these are words, not code

```
public class Welcome {  
  
    public static void main(String[] args){  
        System.out.println("Welcome to CS200!");  
        System.out.println("Good luck!");  
        // you're gonna need it...  
    }  
  
}
```

JAVA PROGRAM STRUCTURE

- Another “**statement**”
- This one will output “**Good luck!**” to the screen
- Happens second

```
public class Welcome {  
  
    public static void main(String[] args){  
        System.out.println("Welcome to CS200!");  
        System.out.println("Good luck!");  
        // you're gonna need it...  
    }  
}
```

JAVA PROGRAM STRUCTURE

- “**Comment**”
- Ignored
- “Note to myself”

```
public class Welcome {  
  
    public static void main(String[] args){  
        System.out.println("Welcome to CS200!");  
        System.out.println("Good luck!");  
        // you're gonna need it...  
    }  
  
}
```

EX: GOODBYE!

- **Task:** Write a program named `Goodbye.java` that outputs the phrase “Goodbye Sam!”
