Day 4: Arrays + functions:

1. Introduction
2. Passing into functions example
   - No return value
   - This is a SIDE EFFECT
3. Assigning a new array inside the function
   - What if we change a now?
4. What if we return an array?
   - Changes first, then returns...
5. Side effects are bad...
   - Errors... how do we test?
6. Ex: Concatenate (we skipped this in class)
7. Ex: Partial sum
8. Ex: Product (we skipped this in class)
9. *** Ex: Match ***
